ENVIRONMENTAL POLICY

"HARMONIZE OUR ENVIRONMENT FOR BETTER LIVING"

Daikin Industries (Thailand) Co., Ltd. is a designer, developer, manufacturer and distributor of Air conditioners, aiming to be leading company whom is committed to promoting environmental protection efforts and reducing greenhouse gas emissions to net zero by applying environmentally friendly practice and implementing the environmental management standard ISO 14001 into the management system. The idea comes from the belief that contributing to the protection of the environment and prevention of pollution related to business operations from the organization is because good industry operators must treat the community and society as part of its organization.

The company has set an environmental policy to be consistent with the objectives and context of the organization by engaging all employees as follows:

1. Continuously improve environmental performances and achieve targets, including prevention of pollution by identifying significant environmental issues.

2. Comply with relevant environmental legislation and regulations, and other requirements which are related to operations, including developing new products for energy conservation.

3. Commit to the improvement on the following issues:

   3.1 Reducing emissions of fluorocarbons (HCFC, HFC) to prevent global warming and protect the ozone layer.

   3.2 Maintain zero waste emission at the factory through participation in 4R activities (Reduce, Reuse, Recycle and Recovery) to reduce the loss of natural resources and safely handle hazardous waste.

   3.3 Strictly control and reduce energy consumption and resources to minimize any effect on global warming and the sustainability of resources.

   3.4 Set and review DIT standards for monitoring and protecting air and soil emissions, along with discharged water.

   3.5 Improve the working environment to be a Green & Clean factory.

This policy can be communicated and disseminated to employees, public and interested parties
