### 3. Safety precautions when using the app

• Since data is sent and received using the Internet, there is a risk of eavesdropping and unauthorized access.

• Manage the smartphone app [DAIKIN Mobile Controller] login ID and password used for this app, and keep them secret from other.

• The unit may not operate according to the response from Alexa due to an unstable internet connection.

• When operating a unit in another room, it is not possible to check the status of the unit, its surroundings, people in the room, etc., so be sure to check the safety in advance before using.

In some cases, people may be killed, seriously injured, or property may be damaged.

○ If you operate by voice or make an inquiry by voice, confirm the response from Alexa, then check if the unit is actually operating in keeping with the response.

### 4. Advance preparation
